

JATON LLC - 2018 PRODUCT CONTENT LABEL

The Sheep Creek Road Solar Facility Project is a renewable electricity product. JATON LLC's Sheep Creek Road Solar Facility Project subscriptions are sold in blocks of 100 kilowatt hours or enrollment levels of 50% or 100% of electricity used.

In 2019, the Sheep Creek Road Solar Facility Project will be made up of the following renewable resources.

Green-e Energy Certified Renewable Energy in Mesa East Solar Facility Project Renewable Energy Product		Generation Location
Solar	100%	El Mirage, California
Total Green-e Energy Certified New Renewables	100%	

To view, as a comparison, the current average mix of resources supplying SCE, please visit [SCE's Power Content Label](#).

The average residential customer served by SCE uses 550 kWh per month. [Source: [SCE 2017](#)]

JATON LLC - Disclosures of Price, Terms & Conditions

Company	JATON LLC.
Enrollment levels	Customers can enroll at 50% or 100% of electricity used or in 100kwh blocks.
Whom should I contact for more information?	Antonio Perez, P.E. tony@jaton-llc.com (818) 667-9078 1071 East Verdugo Avenue, Burbank, CA 91501
How will I be billed?	<ul style="list-style-type: none"> Customers will receive monthly electric bills JATON LLC. You will be billed for SCE's Community Renewables Program on your monthly SCE electricity bill. SCE's Community Renewables Program charges and credits will be listed as separate line items and are in addition to your regular electricity charges. The credit will not reflect the charges between you and the developer.
How will my bill be calculated?	Customers will receive a monthly bill from JATON LLC calculated by the amount of energy used (kWh) multiplied by the rate listed in the Customer Developer Agreement (CDA). Customers will be responsible for all applicable federal, state, and local taxes and charges.
How much will enrolling in the program cost?	JATON LLC's residential rate is \$0.080/kWh fixed for up to 20-years. JATON LLC customers will also be charged a \$6/month subscription fee, which is also fixed for 20-years.
Will my rates change over time?	Customers' normal rates will change based on SCE's rates, either up or down. SCE's Community Renewables rates are based on current California Public Utility Commission approved tariffs. Rates are subject to change annually and as approved by the California Public Utilities Commission.
What is the process for terminating the contract and what is the early termination fee?	The contract can be terminated at any time w/ 30-days written notice. There is no fee to terminate if initial term of contract is completed. There is a \$50 early termination fee if contract is terminated within the first 12-months of the contract.
What length of agreement/contract is required?	1-year
What other fees might I be charged?	Late charge of 3% for bills that are unpaid for more than 30-calendar days.
Program details	<p>JATON LLC has executed a 20-year PPA with Southern California Edison (SCE) to have the Sheep Creek Road Solar Facility Project included in the SCE Community Renewables Program. The SCE Community Renewables Program is Green-e Energy certified, and meets the environmental and consumer-protection standards set forth by the nonprofit Center for Resource Solutions. Under the California Enhanced Community Renewables program, renewable project developers take on the responsibility for marketing electricity product(s) directly to customers, who would normally receive this type of information from their utility. Green-e Energy provides third-party verification that the end customer receives accurate and sufficient disclosures. Green-e Energy also requires that product disclosures, such as the price that will be billed per unit (kWh or kW) of power and the developer's customer service contact information, be provided to purchasers within 60-days of sign-up in the form of a Welcome Packet. Customers will also receive an annual mailing that includes product information.</p> <p>The Sheep Creek Road Solar Facility is expected to begin construction in the Summer of 2020 and be fully operational by December, 2020.</p>
